

# MALLEE PLANT APP

for iPhone/iPad/iPod touch for \$4.49

Do you want to identify and learn more about the plants in the South Australian and Victorian mallee? This is the app for you!

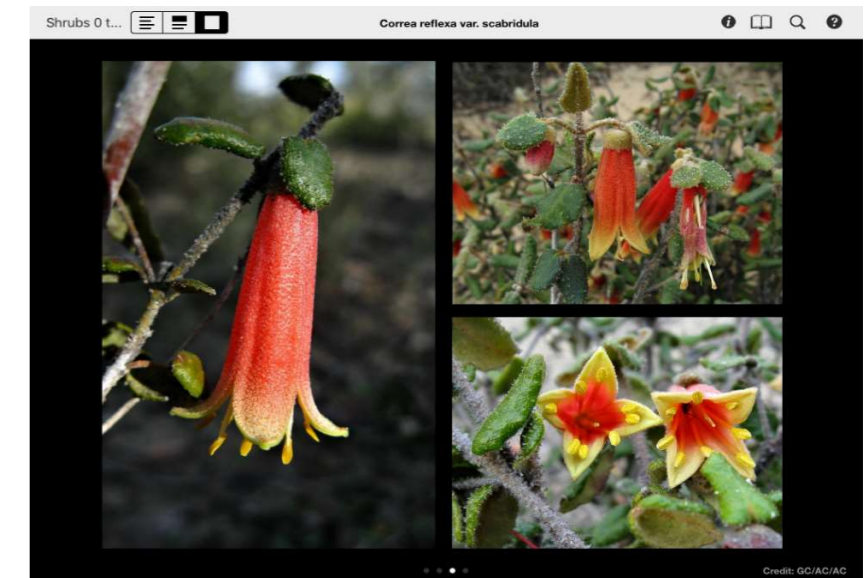

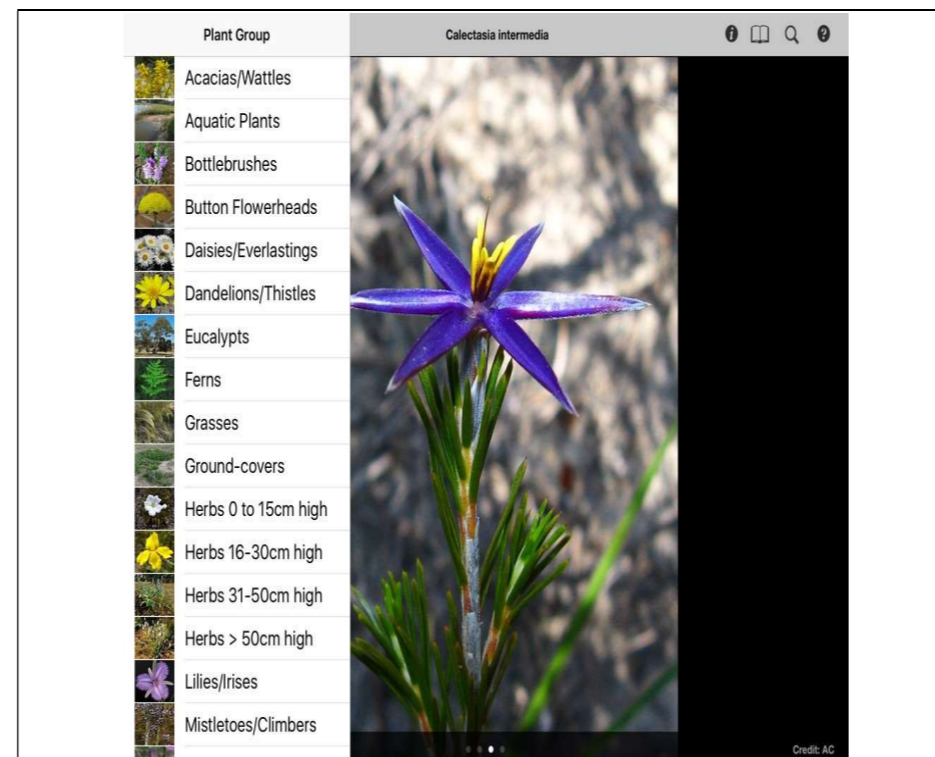

## Mallee Plants of SA and VIC

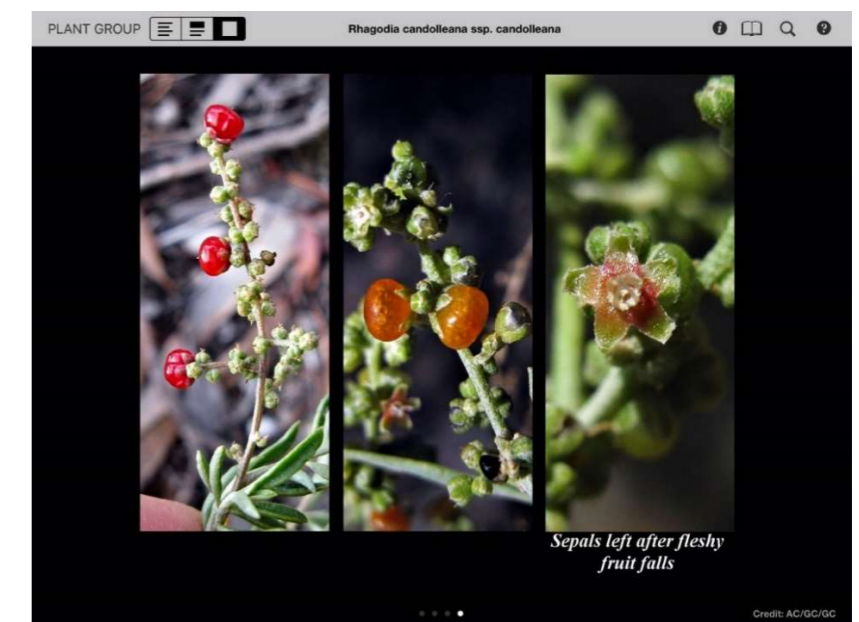

Version 2.0 Updated 10th Oct 2017 1.67GB

© Annabel Carle. Geoff Carle. William Higham

- Now describes 775 of the approximately 2500 plant species found in the South Australian and Victorian mallee.
- Version 2.0 with updated plant names and text edits.
- Functional and easy to use. It does not require internet access after the initial download.
- With over 6000 images, each species has a text description, flowering time and distribution within the mallee.
- Includes both commonly found and rarer plants as well as native and introduced species.
- Many of the mallee ferns, grasses, conifers, rushes, sedges, saltbushes and bluebushes are covered.
- Search facility allows plants to be listed by family, scientific name or common name.

- Includes three information sections:
  - 'About This App' including Park Maps,
  - A detailed glossary,
  - General information about the mallee.
- In areas with slower download speeds, please be patient with the initial download from the iTunes or App Store.

- This app is built on Museum Victoria's open source app generation platform. Details available at: [museumvictoria.com.au/apps/fieldguide](http://museumvictoria.com.au/apps/fieldguide)
